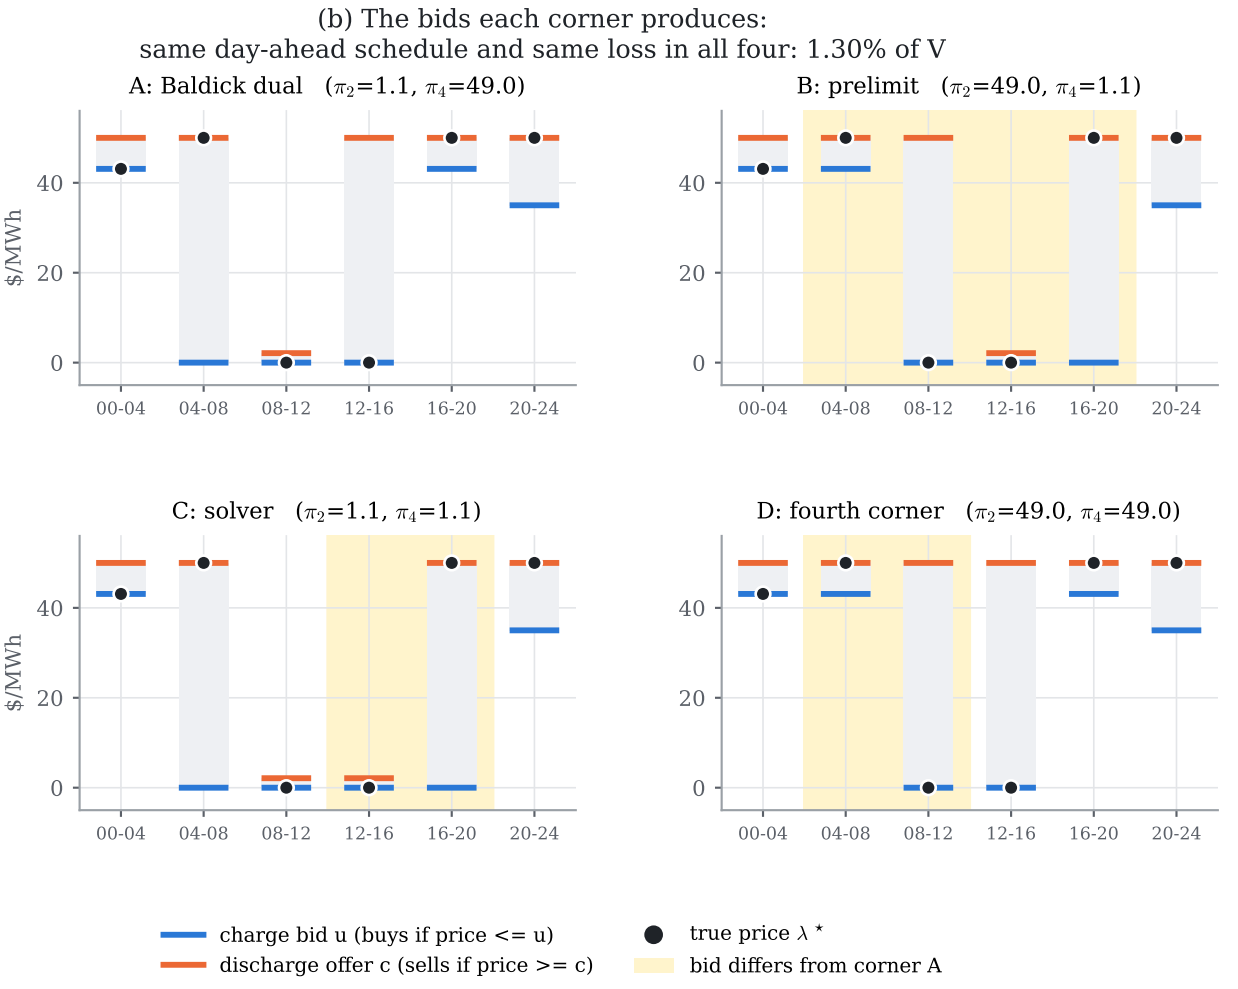
π4: value of a stored MWh at the end of 12-16h ($/MWh)
π2: value of a stored MWh at the end of 04-08h ($/MWh)



(b) The bids each corner produces:
same day-ahead schedule and same loss in all four: 1.30% of V
A: Baldick dual (π2=1.1, π4=49.0)
B: prelimit (π2=49.0, π4=1.1)
C: solver (π2=1.1, π4=1.1)
D: fourth corner (π2=49.0, π4=49.0)
